What are the key risks that are specific to the Issuer?

Strategic risk is categorised as the potential for losses due to changes or errors in defining and implementing the business strategy and the Company's development, changes in the political or regional environment, and fluctuations in the market or customer behavior.

Operational risk is defined as the potential for losses due to defects or errors in internal processes, the supply chain, recruitment, culture, and regulations. Most of them have a low-risk rating and mitigating actions are already in place as part of the daily risk management procedures. The exception to this are our information systems and technologies, which we categorise as high risk.

Financial risk, Kcell can be subject to financial volatility, originating from any number of sources.

Credit risk, Kcell's Credit Risk Policy ensures that products and services are only sold to customers and distributors with an appropriate credit history.

Foreign exchange risk. Kcell's purchases of property, plant and equipment and inventories, as well as certain services such as roaming, partially are denominated in US dollars.

Legal risk is defined as the potential for uncertainty due to legal action or ambiguity in the application or interpretation of contracts, laws or regulations.

In October 2018, the Committee on Regulation of Natural Monopolies, Protection of Competition and Consumer Rights of the Ministry of National Economy of the Republic of Kazakhstan ("Committee") initiated administrative proceedings against Kcell for an alleged administrative violation related to the abuse of its dominant position in 2017.

On October 25, 2019, the Specialized Inter-district Administrative Court of Almaty ruled to terminate the administrative case initiated against Kcell in accordance with item 3-1 of Article 159 of the Administrative Offence Code of Kazakhstan, due to the lack of evidence of offence. The ruling has come into force

Tax audit

In July 2017, the Kazakhstan tax authority completed its complex tax audit for the period 2012-2015. Following the audit, the tax authority made a total claim of KZT 9.0 billion, of which KZT 5.8 billion is for unpaid taxes and KZT 3.2 billion represents fines and penalties for late payment.

On 23 July 2019, the Supreme Court considered the petition, granted the petition and overturned the decision of the Specialised Inter-District Economic Court and the Court of Appeal in respect of an unjustified additional assessment of Withholding Tax (WHT) for a non-resident (Sonera Holding B.V.) as a result of the reorganisation of a legal entity; and an unjustified additional assessment of WHT and VAT for non-residents for remote technical support services. With regard to the remaining contested issues, the decision of the Specialised Inter-District Economic Court and the Court of Appeal was upheld.

As a result of the Supreme Court decision, the KZT 9.0 billion provision for taxes, penalties and fines reduced in total by KZT 5.0 billion, comprising KZT 3.0 billion for unpaid taxes, KZT 0.2 billion in fines and a KZT 1.8 billion reduction of the penalty due to the expiration of the limitation period.

Natural disasters or catastrophes are defined as natural phenomena or processes that provoke catastrophic situations and which are characterised by a sudden reduction in the population, the destruction of infrastructure and property and/or death. Kcell has implemented measures to help minimise disasters such as fires, accidents and incidents arising from human neglect.
